The Delta Protection Commission will complete the ESP by July 2011. The adopted plan will include information and recommendations that will be used for future planning efforts, including the Delta Stewardship Council's policies regarding the socioeconomic sustainability of the Delta region. The ESP will address multiple issues relating to the Delta's economic sustainability, including public safety and flood protection, recreation and tourism, agriculture and business, and infrastructure. This first phase of the project (August through December 2010) will include a comprehensive public outreach program and will establish the overall framework for the study.

For more information on the Economic Sustainability Plan Framework Study please visit the Delta Protection Commission's website at www.Delta.ca.gov. A meeting agenda (same for all five meetings) and maps for each meeting location will be posted on the website one week prior to the first scheduled ESP meeting. All meeting locations are accessible to people with disabilities. If additional accommodations are needed, contact DPC staff at (916) 776-2290.
